

AI without Code: Workflow Acceptance Sheet

Turn one low-risk organisation task into a checkable, stoppable, draft-only workflow with a named human owner.

01	User, decision and non-goal	
02	Synthetic or public inputs and schema	
03	Fixed output, source IDs and route	
04	Baseline and acceptance cases	
05	Prohibited actions, data boundary and human gate	
06	Results, failures, reviewer decision and next step
