

Write safety in from the first step: data, actions, owners, and stop points Worksheet

Use a risk register, data/action boundaries, detection, owners, safe stops, and synthetic failure cases to write safety into the flow.

01	Reader decision and user	
02	Input, data boundary and prohibited action	
03	Simple baseline and acceptable output	
04	Fixed cases, failure and handoff	
05	What someone can check in the system: version, test, trace, or result	
06	What still needs explaining before work use: owner, cost, risk, and next step
