

Transformers, generation, and fine-tuning: move from mechanism to trade-off Worksheet

Use one fixed task to understand attention, decoding, context budgets, and model architecture before choosing a prompt, retrieval, workflow, or training change.

01	Reader decision and user	
02	Input, data boundary and prohibited action	
03	Simple baseline and acceptable output	
04	Fixed cases, failure and handoff	
05	What someone can check in the system: version, test, trace, or result	
06	What still needs explaining before work use: owner, cost, risk, and next step
