

Before you tune: understand how a model learns from error Worksheet

Use a small synthetic classification task to understand representations, loss, gradients, backpropagation, validation, and signals of overfitting.

01	Reader decision and user	
02	Input, data boundary and prohibited action	
03	Simple baseline and acceptable output	
04	Fixed cases, failure and handoff	
05	What someone can check in the system: version, test, trace, or result	
06	What still needs explaining before work use: owner, cost, risk, and next step
