

Agent Workflow Evaluation Evidence Sheet

Evaluate the tool path, terminal state, trace, handoff, retry and release boundary—not only the final answer.

01	Fictional user, decision, non-goal and named human owner	
02	Synthetic scenarios, expected tool path, terminal state and forbidden result	
03	Minimum trace: version, tool sequence, safety decision, latency and cost proxy	
04	Separate outcome, path, safety, handoff, reliability and efficiency rubric	
05	Retry, idempotency, timeout, budget and HANDOFF policy	
06	Regression gate, draft-only baseline, failure record and nonclaims
