

AI hardware, routing, deployment, and transport: from a request contract to a stoppable flow

Worksheet

Do not start with a GPU catalogue. Define input routes, deterministic stops, CPU/accelerator/memory/queue/network trade-offs, budgets, and human handoff first.

01	Reader decision and user	
02	Input, data boundary and prohibited action	
03	Simple baseline and acceptable output	
04	Fixed cases, failure and handoff	
05	What someone can check in the system: version, test, trace, or result	
06	What still needs explaining before work use: owner, cost, risk, and next step
