

A decoding strategy is not a personality: use an output policy instead of blindly tuning temperature Worksheet

Put temperature, sampling, schema, citations, fixed cases, and handoff into an acceptance flow instead of trusting one fluent output.

01	Reader decision and user	
02	Input, data boundary and prohibited action	
03	Simple baseline and acceptable output	
04	Fixed cases, failure and handoff	
05	What someone can check in the system: version, test, trace, or result	
06	What still needs explaining before work use: owner, cost, risk, and next step
