

AI Pilot Evidence & Measurement Worksheet

Move from local evaluation to a discussable pilot design: separate the metric, owner, comparison and stop rule first.

01	Fictional decision, human owner and actions that remain prohibited	
02	The boundary between offline model metric, workflow metric and delayed outcome	
03	Data owner, allowed/excluded data boundary, retention expiry and deletion owner	
04	Baseline, candidate, assignment unit, frozen comparison strategy and protocol date	
05	Safety guardrail, reviewer evidence, failure response and rollback target	
06	Outcome observation window, claim status, unknowns and the next approval question
