

Build a reviewable AI packet from public vulnerability data Worksheet

Use public KEV data to record the source and allowed use, then compare a change against fixed cases. If a required case fails, a person decides whether to hold or roll it back. Do not scan, patch, or claim organisational exposure.

01	Reader decision and user	
02	Input, data boundary and prohibited action	
03	Simple baseline and acceptable output	
04	Fixed cases, failure and handoff	
05	What someone can check in the system: version, test, trace, or result	
06	What still needs explaining before work use: owner, cost, risk, and next step
