

Eight-Week Learning-to-Evidence Sprint

Turn any AI course or tutorial into a learning path with a business case, evaluation and GitHub evidence.

01	Target role and one evidence gap	
02	Fictional business case, user and non-goal	
03	Baseline, synthetic or public data and data boundary	
04	Technical work and non-technical delivery work	
05	Evaluation, failure record, version and rerun	
06	README, eight-week review and stop condition
