

LLM evals, human review, and observability: a fluent answer is not enough to release Worksheet

A fluent answer is not enough. Check each fixed case, have a person review errors, keep a before-and-after record for every change, and stop if a required case fails. A passing local check is not production approval.

01	Reader decision and user	
02	Input, data boundary and prohibited action	
03	Simple baseline and acceptable output	
04	Fixed cases, failure and handoff	
05	What someone can check in the system: version, test, trace, or result	
06	What still needs explaining before work use: owner, cost, risk, and next step
