

AI Learning Source and Role Evidence Map

Choose a source from the target role, evidence gap and first-week artefact—not a credential or platform name.

01	Target role, current capability and one evidence gap	
02	Selected route: no-code / ML basics / LLM builder / AI application + evaluation	
03	Official source, access date, prerequisite and reuse boundary	
04	First-week technical artefact: schema, baseline, metric, fixture or fixed cases	
05	Non-technical evidence: data boundary, human owner, permission, error cost and stop condition	
06	Nonclaim, next inspectable step and portfolio link
